Professional Summary

Data Engineer with 5 years of experience designing scalable batch and near-real-time ETL/ELT pipelines processing **50M+ daily records** using Python, SQL, PySpark, and Apache Airflow across Azure, AWS, and Databricks. Proven track record of cutting compute costs, accelerating runtimes, and delivering governed data products for Fortune 500 enterprises, with hands-on expertise in Snowflake and dbt.

Professional Experience

Data Engineer | Omnicom *Apr 2025 – Present*

- **Architected and maintained scalable ETL/ELT pipelines** for the platform using Python, SQL, and PySpark to process **10M+ daily records** across 12+ sources, ensuring **99.8% data integrity**, reducing processing runtime by **27%**, and improving cluster utilization by **34%**.
- **Nissan Data Platform:** Optimized legacy Airflow pipelines by refactoring Python and SQL workloads, slashing runtime by **75% (80 to 20 minutes)**; built an end-to-end **Medallion Architecture** (Bronze, Silver, Gold) across **5TB+** data lakes and **2M+ YouGov records**, cutting downstream query latency by **38%** and prep time by **40%** for Marketing Science.
- **Spearheaded cost-effective cloud migration initiatives**, transferring 25+ ingestion jobs from Airbyte to AWS Glue orchestrated via Airflow to cut cloud compute costs by **29%**, reduce ingestion overhead by **31%**, and achieve **99.5% SLA compliance**.
- **(ARD) Agile Release Delivery:** Built and maintained batch pipelines ingesting **50M+ comScore and Lotame audience records** across **45+ global markets**, delivering 100% on-time monthly and quarterly releases to the Omni Dashboard.
- Built an **Airflow health-check framework** monitoring audience, storage, and compute health, and extended regression test pipelines with automated Microsoft Teams alerts to cut failure detection time (MTTD) by **65%**.

Data Engineer | Zebra Technologies *Jun 2021 – Apr 2025*

- Designed scalable Azure data pipelines integrating 20+ REST APIs and real-time sources (**15M+ daily events**, **28% faster onboarding**); optimized **8TB+ workloads** with **PySpark, Databricks SQL, and Delta Lake**, reducing runtime by **15%** and I/O scan volume by **35%**.
- **Automated 40+ Airflow and Azure Databricks ETL pipelines** across Fortune 500 and retail clients (**Walgreens/ WBA, Gap, Michael Kors, Philips, Flowers Foods, J.Crew, Rack Room Shoes, TCP, EBW**), enforcing automated validation to cut manual effort by **45%**, boost efficiency by **18%**, and reduce quality incidents by **42%** (**99.7% schema compliance**).
- **DataOps Utilities:** Reduced Databricks compute costs by **20% ($45K+ annual savings)** by building a REST API utility tracking per-job runtime and DBU usage across **200+ workflows** and **15+ client workspaces** (including **WBA, Gap, Michael Kors, and TCP**).
- **Input Output SFTP Management (IOSM):** Built an ingestion and delivery monitoring framework tracking **500+ daily file transfers** with **6-hour early SLA warnings** and destination validation, cutting manual monitoring effort by **80%** (**99.4% SLA adherence**).
- **Bimbo Bakeries (BBU) & Bimbo Canada (BC):** Co-led migration of 30+ AWS-SQL pipelines to Azure Databricks Delta Live Tables (DLT) with SCD Type 2 logic for **12M+ daily retail records** (**33% faster batch runtime**); maintained Airflow, PostgreSQL, and AWS S3 ETL pipelines for **8M+ daily supply-chain rows**, accelerating BI refresh speed by **26%**.
- **GlaxoSmithKline (GSK):** Architected distributed PySpark pricing engines analyzing **25M+ historical transactions** across **50+ markets**, powering pricing strategies worth **$100M+ in annual revenue** with **92% predictive accuracy**.

Projects

- **PayLedger | Card Transaction Analytics Warehouse:** Built an end-to-end ELT pipeline loading **50K+ daily card transactions** into a **Snowflake** star schema, modeled in **dbt** with SCD Type 2 snapshots and Soda data-quality checks; engineered CDC-style incremental loads via Snowflake Streams and Tasks, query clustering (cutting scan volume by **40%**), and slim CI deployments.
- **FocusTube | Local-first YouTube-to-course platform:** Built a self-hosted Node.js/Express app with progress tracking, timestamped notes, SQLite persistence, Docker deployment, observability, and **145 automated tests**.
- **my-macros | Nutrition and macro-tracking app:** Built a Flutter/Firebase app with clean architecture, Firebase authentication, ML Kit OCR and barcode scanning, micronutrient goals, meal plans, and BMR calculations.

Technical Skills

- **Languages & Analytics Engineering:** Python, SQL, PySpark, Pandas, NumPy, Bash, Snowflake, dbt, Data Modeling, Data Warehousing, ELT, Query Optimization, Performance Tuning
- **Platforms & Orchestration:** Apache Airflow, MWAA, Databricks, Delta Lake, Databricks Workflows, AWS Glue, Airbyte
- **Cloud & Databases:** AWS, Azure, GCP, PostgreSQL, MySQL, Amazon RDS, BigQuery, Athena, Starburst, SingleStore
- **Quality, Governance & DevOps:** dbt Testing, Data Validation, Observability, Metadata Management, Data Lineage, Documentation, Security Controls, Git, GitHub Actions, CI/CD, Docker, Automated Testing, Production Support

Education

Bachelor of Engineering | Computer Science *Jun 2017 – Jun 2021*
Chandigarh University, Punjab
